Questions and Clarifications:

Q1 - The specifications require that products quoted be listed in the Hwy 70 Landfill's Solid Waste Disposal Facility Permit. Which alternate daily cover products are currently listed in that permit?
A1 - Bio Cover- Produced by Profile, Verdac Landfill Pellets by LSC Environmental Products are the two approved products for use at the Hwy 70 Landfill.

Q2 - Can the County share an estimated number of truckload orders expected during the initial 90-day contract term? It would help us price the truckload quantity accurately.
A2 - Typically one truck load per 90-day period at most 2 truckloads per 90-day period.

Q3 - The Act 2023-409 certificate in the packet certifies that the contractor is a for-profit entity with 10 or more full-time employees. We're a small business with fewer than 10 employees — how should we complete that certificate?
A3 – Under this set of circumstances the form does not apply. Please note on the form that you have fewer than 10 employees.

Q4 - Item 2 of the Certificate of Compliance with Act 2023-409 (Economic Boycott Certificate) requires the contractor to certify that it has 10 or more full-time employees. Our company currently has four (4) full-time employees plus additional part-time staff, so we cannot truthfully certify Item 2 as written.
A4 – Please see the answer to Question 3.
