MEMORANDUM

TO: Prospective Bidders

FROM: Cody Long, P.E., PTOE
Chief Civil Engineer

RE: Bid Addendum 1
Project SCP 59-889-18
Right Turn Lane on County Road 17 at County Road 44
Grade, Drain, Base and pave, Widening, and Traffic Signal

To all Prospective Bidders:

We have revised the project quantities to add a pay item for Geosynthetic Reinforcement for Soft Soil Stabilization. The pay item is not shown in the plan set, but is added to the project bid quantities. The pay item is intended to be available if soft soil is encountered and it is determined this would be necessary to address.

Amended plan sets will not be issued, so all prospective bidders should note the required pay item changes listed above and on the attached sheet. Attached to this memorandum is an updated bid price sheet for the bid proposal. This sheet supersedes and shall replace the original issued in the bid packages. Any questions regarding these changes should be addressed to the Shelby County Highway Department prior to the project bid opening.

Regards,

A handwritten signature in blue ink, appearing to read "Cody Long", is written over a light blue rectangular background.
