

Shelby County Airport Mass Storage Hangar T

ADDENDUM NO. 4

Date: September 28, 2023

RE: Shelby County Airport Mass Storage Hangar T

BID DATE AND TIME:

Thursday, October 5, 2023 at 2:00 p.m.

Location for the bid opening remains the Shelby County Manager's Office, located at 200 West College Street, Room 123, Columbiana, Alabama, 35051

Substitution Request:

- SS-295 Pre-Engineered Metal Hangars – 1.2 – Kirby Building Systems – APPROVED

Questions and Clarifications:

Q1 – Per the grading plan, the back/east side of the building will have an elevation change of about a foot from the south side to the north. Will the brick wainscot be installed 4' tall from the south elevation, or the north elevation? Resulting in either a 3' tall wainscot on one side, or a 5' tall wainscot on one side.

A1 - This would need to stay consistent with Mass Hangar S, with 4' being the max height. Therefore, one side would be 4' and the wall would taper down to 3' on the other side.

Q2 - Are the Evergrate downspout and sidewalk grates to be installed at the existing Mass Hangar S downspout locations in addition to the new ones installed on Mass Hangar T?

A2 - Yes, the five existing gutter downspouts will need to be addressed on the existing Mass Hangar S and the sidewalk section along the south side of Mass Hangar S to match the proposed downspouts on Mass Hangar T. Downspouts and sidewalk grates on proposed Mass Hangar T and the adjacent existing Mass Hangar S are a subsidiary component of the building and/or sidewalks to be constructed.

ADDITIONAL NOTE: SS 295-1.5c. states that the proposed Mass Hangar T shall have a minimum of 8 gutter downspouts. This is hereby changed to 10 gutter downspouts (5 on each side) to match the existing Mass Hangar S.
