Questions:

Q1 - The bid documents mention totes and drum delivery. Please confirm that this bid is for bulk delivery of Liquid Aluminum Sulfate.
A1 – The bid document is a generic delivery format we use for all of our chemical bids. As specified on the bid form, this contract is for Liquid Aluminum Sulfate delivered in bulk tankers (per dry pound delivered).

Q2 - Will the awarded vendor be expected to make split deliveries?
A2 – Each plant operates as an independent entity. While they may place orders on the same day, orders will not be split between the two.

Q3 - What is the size of the alum deliveries? Will this be for full truckloads or Less than Full Truckloads?
A3 – Each plant typically orders 46,000 lbs to 50,000 lbs per delivery. The monthly frequency varies each month depending on production. Deliveries are generally full truckloads, though a half-load may occasionally be requested if operational needs require it.
